ECCO EQUIPMENT CORPORATION

July 2019 | Volume 13, Issue 2

## From Old to New

Geneva Steel was a steel mill located in Vineyard, UT founded during World War II to enhance national steel output. It operated from December 1944 to November 2001 and provided thousands of jobs to the local community and surrounding areas. However, the distance from plant to markets, increased labor costs and foreign steel prices contributed to the decay of the plant, and it permanently closed its doors in November of 2002. The site sat vacant until it was sold to Anderson Geneva, a sister company of Geneva steel in November of 2005, and plans were put forth to remediate and redevelop into a residential community.

Entact Environmental Construction Services was awarded the contract and started to mobilize equipment to the site in January of 2019. Entact will remediate the site by excavation, crushing, sorting and on-site placement of 30,000 cubic yards of material. Some of the material is contaminated and will have to be hauled off or contained in a 2,000 linear foot on-site engineered berm. The conclusion of the remediation will be the construction of a soil cap, vegetative cover and drainage swales. Entact has surveyed the job and will be done with the project in 2 years.

ECCO has been on the job since the beginning, providing water towers, motor graders, dozers, and excavators. The site is within a mile of our Lindon branch so ECCO is particularly well positioned to provide the world class service our customers expect. Entact and ECCO have partnered up on several jobs in Utah and Nevada and have formed a lasting relationship. We look forward to assisting Entact with present and future jobs and continuing to be a vital partner to their business.

# New Hires!

**Brandon Baugh** — Utah Sales Rep.
Brandon Baugh is a hardworking man with over 20 years of experience in construction and sales. Everything in his life revolves around his family and his family adores him! He loves Baseball, Coaching, Hunting, Fishing, Camping and Hockey. He is very excited for this new experience!

**Travis Moyes** — ND Mechanic
Travis was born and raised in eastern Idaho. He attended Eastern Idaho Technical College and graduated in 2002 from their diesel technician program. After working on heavy equipment for some time in Idaho and Wyoming, he moved to Williston, North Dakota, where he jumped into the oil field industry and then dealership work. From there he was able to join the ECCO family. Travis has 2 boys and 2 girls, and 2 grandsons and 2 granddaughters.

**Rebecca Scheer —** Visalia Office Coordinator
Rebecca's expertise in accounting will be a benefit to ECCO Equipment. She grew up in a walnut orchard near Farmersville and enjoys gardening and spending time with family. She's looking forward to the arrival of her first granddaughter, adding to her family of 1 son, 1 daughter and one grandson.

## Celebration Time!

Congratulations to Riverside Service Technician **Jason Waldron** and Desiree Rash who got married on May 11!

Congratulations to Santa Ana Service Technician **Larry Lozo** and Amanda Roza who got married on June 15!

# Compact Equipment Finds Success Amongst ECCO's Heavy Equipment

Throughout the last 60 years, ECCO has established itself as the premier supplier of heavy earthmoving equipment in the western USA. But that doesn't mean we aren't open to new products and services. For the past three years, ECCO customers in Idaho and North Dakota have repeatedly told us that they can't find the compact equipment they need from a reliable source. As a result, we have added a dozen new compact machines in these markets, most of them brand new!

In addition to John Deere and Bobcat compact track loaders and mini excavators, and a full line of attachments including thumbs, breakers, augers, vibe plates and more, we have added three Towmaster trailers which our customers can also rent. In combination with our instant credit process, we can now provide equipment to small contractors and farmers who just need something for a few days. They can literally pull up to our store at 7am and drive off with a Bobcat on a trailer behind their pickup before 8am.

Adding compact equipment to our fleet has helped make ECCO the one stop shop for our customers. Long time loyal customers love the convenience of getting all their gear from us. This new product line has also attracted new customers to ECCO.

Cougar Excavation is using our E85 alongside a 544 wheel loader and a 330 for maximum efficiency on this municipal pipeline job.

RSCI working on this water treatment plant expansion is using our new E45 to get into the tight spots the heavy gear can't go.

## Fun Facts!

- Did you know that diesel engines and Budweiser were funded by the same person? The famous German immigrant Adolphus Busch brought with him his brewery experience and opened a brewer's supply store. After that he bought the American rights to Rudolf Diesel's inventions and established the Diesel Engine company.

## ECCO Work Anniversaries
